

## Risultati

### Computational analysis of biological structures and networks

#### Results Workshop 22-01-18

Finding discriminative and interpretable patterns in sequences of surgical activities	14/15
Distributed Representations of Words and Phrases and their Compositionality	13/15
Bag-of-words representation for biomedical time series classification	15/15
Support Vector Feature Selection for Early Detection of Anastomosis Leakage From Bag-of-Words in Electronic Health Records	13/15
An Integrated Texton and Bag of Words Classifier for Identifying Anaplastic Medulloblastomas	14/15
Improving a Bag of Words Approach for Skin Cancer Detection in Dermoscopic Images	14/15
