Possibilità di Internato presso l’azienda farmaceutica Roche

Roche is recruiting for an internship in Pharmaceutical Research and Development Informatics - Data Science for a BSc or MSc level. The intern will be part of the team working on Scientific Data Integration and Text Mining and Terminology Management, and needs to have knowledge of the most common programming and scripting languages. The internship could potentially constitute a stage for a Master Thesis. The period ranges from 6-12 months and Roche would provide support for relocation expenses. The internship can start immediately. See more details and application form at
