Corso di Dottorato in Informatica

PhD Course on “Making a (good) presentation”

Prof. Roberto Giacobazzi

Abstract:

The course is intended to teach how to make a good presentation of scientific results. After a first introduction to the problem of presenting scientific results in front of different audiences, the students will be encouraged to prepare (or reuse) a presentation of one of their papers or projects. This hands-on activity is intended to practice the students in the art of making a presentation challenging and attractive.
