

Cyber Security Analyst

Company Description:

Moviri Consulting is the first company of Moviri and its foundation. Moviri's professionals use data, software, and insights to solve substantial business challenges for Fortune 500 corporations, multinational banks, global media conglomerates and some of the most respected brands in a variety of industries. The Moviri Consulting Analytics team revolutionizes enterprise processes and customer relations, thanks to data science and big data processing.

Job Description:

We are hiring a Cybersecurity Analyst to work in our growing IT Security team. The successful candidate will be directly involved in designing, building and operating a secure infrastructure using the latest security technologies. A Cybersecurity Analyst is an IT enthusiast who has recently graduated, or is in the process of graduating, and desires to build his/her career in complex technological fields, both at national and international level. Analysts are team members from day one, as they participate with a positive and analytical approach to the achievement of project goals, developing experience and flexibility within different IT domains. In doing so, they find constant and spontaneous support in colleagues who share their same approach to IT, innovation, quality, and results.

Full-time position at the Milan or Padua Office.

Responsibilities:

- Working on delivery of strategic IT security projects under the supervision of Senior colleagues;
- Master the technologies involved in assigned projects;
- Constantly learn, be open to quickly master new technologies and new challenges;
- Effectively collaborate with the team, adopt best practices around high quality engineering;
- Understand security frameworks and Moviri portfolio security solutions.

Job Requirements:

- Bachelor's or Master's Degree preferably in IT or any related field of expertise;
- Cybersecurity classes attendance is preferred;
- Basic knowledge about IT Architectures (networks, operating systems, middleware, databases);
- Fundamentals network communication technologies like HTTP, SSL;
- Basic knowledge of security concepts;
- Experience using SQL, scripting languages, and data extraction methods;
- Exposure to databases and modeling concepts;
- Proficiency in programming languages (Java or Python are preferred);
- Desire and drive to learn new skills and technologies;
- Excellent problem-solving, time management, and organizational skills;
- Work effectively in a Team;
- Strong presentation and writing skills.
- No previous professional experience.

Compensation & Benefits:

- Competitive salary package;
- Yearly performance bonus;
- Per-diem allowance for out of office assignments;
- Meal vouchers;
- Welfare program to pay for public transportation, cinemas, gym, Amazon vouchers and more;

- Integrative health insurance;
- Lenovo or MacBook Pro laptop and latest generation smartphone;
- Continuous learning and training: O'Reilly Safari library, professional certifications, meetups, conferences & tradeshow;
- Terrace beer happy hour every Friday;
- Annual offsite company meeting.
